PROJECTS

JobFound / *Next js, Typescript, Postgressql, Prisma, Tailwindcss, ShadcnUI, JWT*   LIVE
- **Developed a job-finding platform**, "**JobFound**," enabling users to discover suitable job opportunities and connect with **startups** and companies; implemented **user and company registration, secure job posting**, and application management functionalities.
- Utilized **Next.js, TypeScript, Prisma, and PostgreSQL with JWT authentication** to ensure secure, scalable, and seamless experiences for both job seekers and employers, providing full route protection.

E-commerce / *Next js, Typescript, ShadcnUI, PostgresSQL, Prisma, Cloudinary, redux toolkit, JWT*   LIVE
- **Built a full-featured e-commerce platform** with an **admin panel and customer store**, enabling complete e-commerce functionalities including product listings, categories, shopping cart , and secure checkout, similar to leading platforms like Flipkart.
- Integrated **Cloudinary for product image management, Redux Toolkit for dynamic cart functionality, and Stripe for secure payment** processing , creating a streamlined and responsive user experience.

Netflix/ *Next js, TailwindCSS, Typescript, MongoDB, Mongoose*   LIVE
- **Developed an end-to-end Netflix UI clone** with Tailwind CSS, replicating the platform's design and functionality to Deliver a visually engaging and responsive user experience.
- Implemented **Google and Github authencation** for secure user login, enhancing accessibility and providing a seamless authentication flow.

Blogify / *Next js, TailwindCSS, ShadcnUI, Typescript, JWT, PostgresSQL, Prisma Orm.*   LIVE
- **Built a full-stack blogging platform, "Blogify**," using Next.js, Typescript, and ShadCN UI , enabling user to view, **create, update, and delete blog posts** with a seamless and intuitive interface.
- Implemented **JWT-based authencation** to ensure secure access control, allowing users to manage blog content while protecting user data and enhancing platform security.

URL-Shortner / *Node.js, EJS, javascript,*   LIVE
- **Developed a URL shortening application** using **Node.js, Ejs, and javaScript**, allowing users to convert lengthy URLs into concise, shareable links.
- Implemented efficient backend logic to handle **URL storage and redirection** , enhancing usuer experience by providing quick and reliable link shortening.

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, Typescript
Frontend: HTML, CSS, JavaScript, React js, Next js, Redux, TailwindCSS, ShadcnUI
Backend: Node js, Zod, Express, Mongoose, Prisma
Database: MongoDB, Postgresql
ORM: Prisma, Drizzle
Authentication: JWT, NextAuth, Clerk
Developer Tools: Git, Github, VS Code, Postman,
DevOps: Docker, Github Actions, AWS
